ABOUT ME

Full-stack Software Engineer with experience in microservices-based fintech systems, focusing on finance and banking workflows. Experienced in building scalable applications, improving performance, and driving business process optimization in Agile environments.

PROFESSIONAL EXPERIENCE

iFAST Global Hub AI Sdn Bhd IT Specialist

Sep 2024 - Present

- Develop, design and maintain microservices-based remittance and banking enterprise applications.
- Enhance system by implementing new features and refactor code using Java (Spring Boot) for backend services and Angular (TypeScript) for frontend development.
- Integrate Bank API and improved transaction processing performance, achieving sub-0.5 second per transaction processing and enhanced system reliability.
- Redesigned and optimized onboarding workflows by automating screening and eligibility checks and approvals, improving customer conversion rate and operations team efficiency.
- Collaborate with business units across multiple regions to gather requirements and translate them into scalable technical solutions.
- Support production systems through monitoring and troubleshooting, ensuring high availability for business-critical applications.
- Contribute to CI/CD and containerized deployment workflows using Docker, Kubernetes, and Argo.

PETRONAS Digital Sdn Bhd Software Engineer Intern

Feb 2023 - Aug 2023

- Contributed to the development and maintenance of web applications using diverse technology stacks.
- Participated in the full software development lifecycle (SDLC), including Agile Scrum ceremonies.
- Utilized Azure DevOps and Git for version control, source code management, and team collaboration.
- Served as the main developer for an internal group entity management system built with OutSystems.
- Contributed to the development of an oil plant management system using Vue.js and ASP.NET.

TECHNICAL SKILLS

- Programming Languages: Java 17/21, TypeScript, JavaScript, Python
- Frontend: Angular, React, Vue.js, Flutter
- Backend: Spring Boot, Node.js, Express
- Cloud & DevOps: Docker, Kubernetes, AWS, Argo, Gitlab CI/CD
- Database: PostgreSQL, Firebase Firestore
- System Designs: Microservices Architecture, REST APIs, OOP, Agile/Scrum
- AI Development Tools: Claude Code, Codex, Model Context Protocol (MCP), AI Agent Workflows
